

Evelyn's DOUBLE TAKE

Design and Event Editor Evelyn Eshun shows us how easy it is to design two different looks using the same vanity from Native Trails.

This look is the perfect balance between contemporary and vintage styles. - EVELYN ESHUN

A simple square mirror with rope detailing brings some vintage whimsy.

Adding moisture-loving tropical plants to any interior brings life to a room.

Open storage under a sink will give a more open look to your bathroom, perfect for small spaces. Enhance your décor with baskets that double as added storage.

classic *elegance*

This rustic, masculine look focuses on natural and textural elements. - EVELYN ESHUN

Lightly polished solid granite counter is durable and simple, a perfect backdrop to allow the sink to be the star of the show.

Using wood floor as a wall treatment adds natural texture and brings instant warmth to the space.

Baskets in a natural finish bring a spa-like feeling to the area while providing an easy storage solution.

modern LODGE

1 For an elegant look, I chose the Cuzco vanity with Carrara marble accents. Finishing the vanity with a Carrara marble counter top and a hammered nickel sink creates the perfect balance between contemporary and vintage styles. A Laminam porcelain slab with a Calcutta marble look creates the perfect backdrop, adding drama to the space.

2 The Hana vessel sink sets the vintage tone for the space. The Venty faucet has subtle curves for a soft, feminine feeling and an eight inch spread brings added formality to the space.

3 Arrange a selection of handpicked wildflowers in vases for a humble décor accent!

4 To create the more rustic, masculine look I focused on natural and textural elements. I chose hammered nickel details with a honed, black granite counter top for the Cuzco vanity. The lightly polished solid granite counter is durable and simple, allowing the handcrafted concrete vessel sink to shine. The result is a decidedly artisan-crafted look that is warm and inviting!

5 The Paradox faucet contrasts against the other more textured and matte finishes in the space. When choosing your faucet, ensure that you can easily fit your hands underneath and that the water hits a spot which discourages over splashing.

6 Layering a wood mat over a terry towel allows water to be absorbed while creating an attractive border.

7 Broad-leaved tropical plants add a handsome and sculptural look to any space.
