# Kitchen & Bath Business **2016** READERS' CHOICE AWARDS

*Kitchen & Bath Business (KBB)* magazine is proud to present the winners of our fourth-annual *KBB* Readers' Choice Awards. More than 11,000 votes were cast by kitchen and bath professionals, including designers, dealers, architects and builders, to identify the brands and manufacturers they rely on in 25 kitchen and bath categories.

The following are those manufacturers and brands that received the most votes in each of these categories, listed alphabetically, to represent the range of specific types, styles, materials and price levels in which these top-votes brands offer products.

Our readers were asked to make their choices according to specific criteria, including local availability, the support they receive from the supplier/manufacturer, price point for their typical client budget and other category-specific criteria as noted below each category.

We are excited to present these results to you, a testimonial from your peers for brands and manufacturers they turn to most often for their clients. Please join us in congratulating these companies for their excellence in delivering quality products and superior service.

On the following pages and on [kbbonline.com](http://kbbonline.com), you will find more detailed information on some of the winning companies our readers have voted for and why they are deserving of this recognition.

### CONGRATULATIONS TO THE 2016 WINNERS!

## What's Hot in Bathroom Sinks

1. The Nipomo sink from **NATIVE TRAILS** features a rectangular shape in a concrete look. It is lightweight and low maintenance and is available as an apron-front, under-mount or vessel sink. It is priced at \$575 and is offered in ash, slate and pearl finishes

2. Hand-hammered Hammerwerks copper sinks from **HOUZER** are formed from heavy copper sheets. They are available for use in the bathroom, kitchen or bar-prep area.

3. The **NEOLITH** sink has near-zero porosity, making it hygienic, stain resistant, easy to clean and impervious to cleaning chemicals. Made of the same materials as the bathroom countertop, it fully integrates with the vanity for a unified bathroom concept.

4. A transitional console for small spaces, the Harbor Washbasin from **STONE FOREST** has a curved front profile on a polished nickel stand with a shelf. It is available in Luna Blanca Oro marble or Carrara marble and is also available in a wall-mounted version.

5. **SIMAS'** new line of decorative countertop washbasins – Sharp – features an extremely thin rim and a base diameter of 20 inches. Its shape emulates a potter's wheel, and it is available in a variety of colors, from white to earth tones to pastels to black.

6. The Sartorial Collection from **KOHLER's** Artist Edition line of bathroom sinks includes herringbone and paisley patterns, which celebrate the white-on-white trend with raised designs that are timeless and dimensional.
