

General Instructions:

We strongly recommend that this product be installed by a professional.

Materials Recommended:

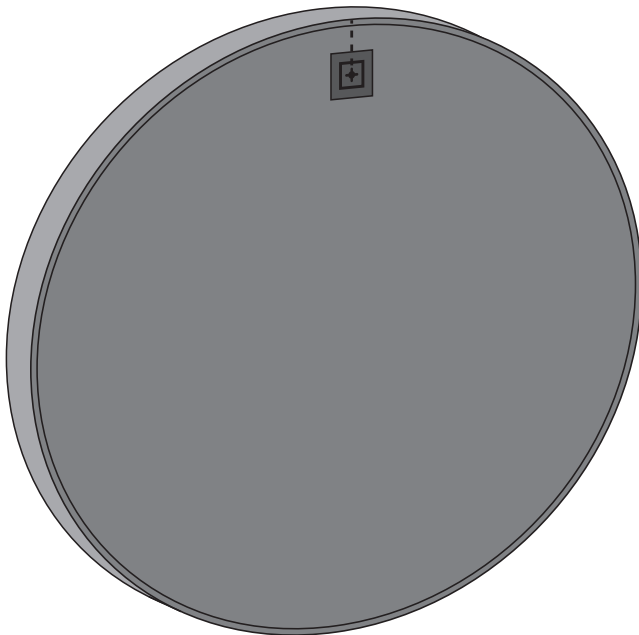

Appropriate hanging hardware for your chosen mounting surface *(Rated for at least 20lbs)*

Tools Needed:

Measuring Tape Pencil Level

1. Select the mounting location for your mirror that will accommodate the size and weight.
2. On the back of the mirror, measure and record the distance between the top of the mirror and the center of the mounting bracket. *(Figure 1)*

Figure 1

3. Hold the mirror to the selected mounting location and lightly mark the wall at the top center of the frame, then using the previously recorded measurement mark the wall down where the mounting bracket center will sit. *(Figure 2)*
4. Install the hanging hardware at the markings on the wall according to the manufacturer's instructions and then attach the mirror.
